Project Design Phase
Solution Architecture

Date	11 February 2026
Team ID	LTVIP2026TMIDS84782
Project Name	ShopSmart: Your Digital Grocery Store Experience
Maximum Marks	4 Marks

Solution Architecture:

The solution architecture of **ShopSmart – Online Grocery System** defines how the web application, backend server, and local database work together to provide online grocery services.

Its goals are to:

- Provide a simple platform for customers to browse products and place orders.
- Enable admins to manage users, products, and orders.
- Ensure secure authentication and structured data storage.
- Define system features and technical structure for smooth development and deployment.
