Ideation Phase
Brainstorm & Idea Prioritization

Date	10 February 2026
Team ID	LTVIP2026TMIDS84782
Project Name	ShopSmart: Your Digital Grocery Store Experience
Maximum Marks	4 Marks

Brainstorm & Idea Prioritization Template:

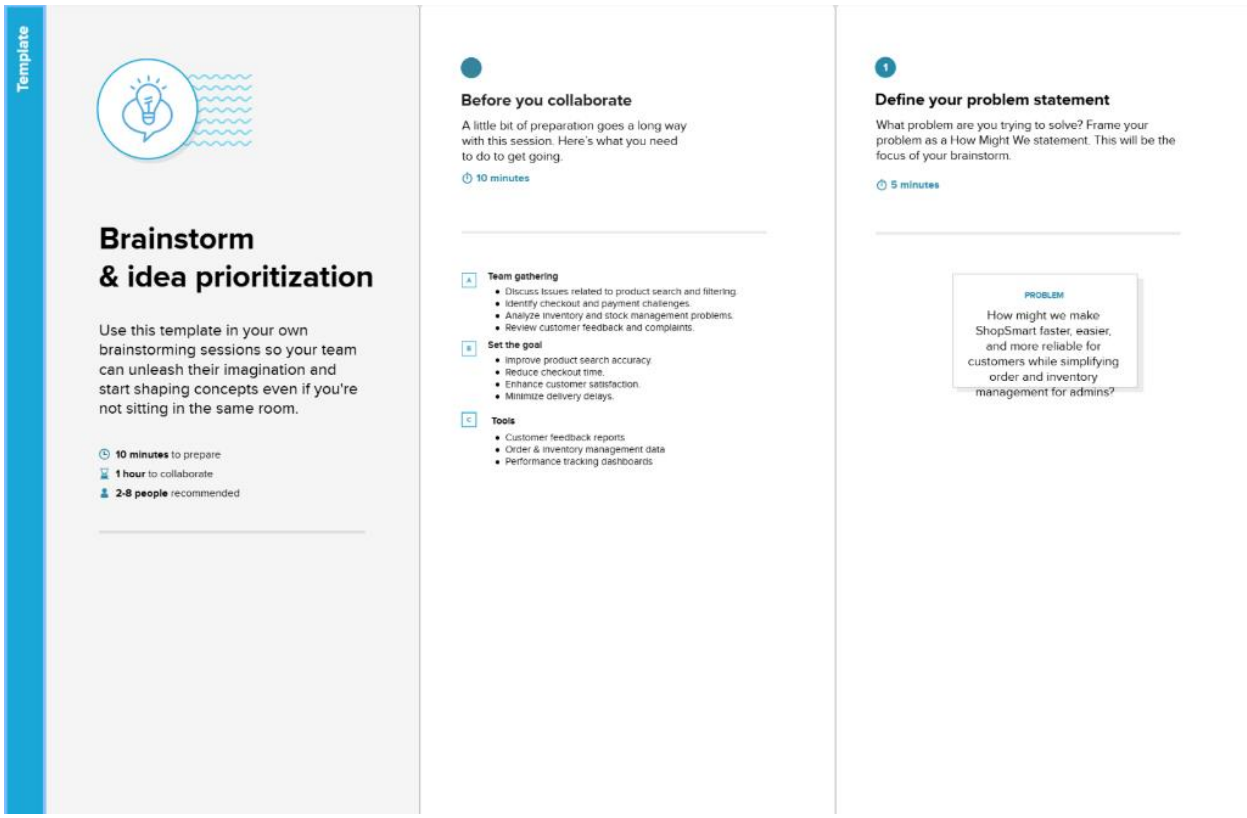
Brainstorming allows our team to openly discuss ideas to improve the ShopSmart online grocery platform. Every team member can share suggestions related to product search, cart management, checkout, inventory tracking, and order handling.

In this stage, we focus on generating as many ideas as possible without judging them. Creative and practical solutions are encouraged, and team members build on each other's ideas to improve the overall system.

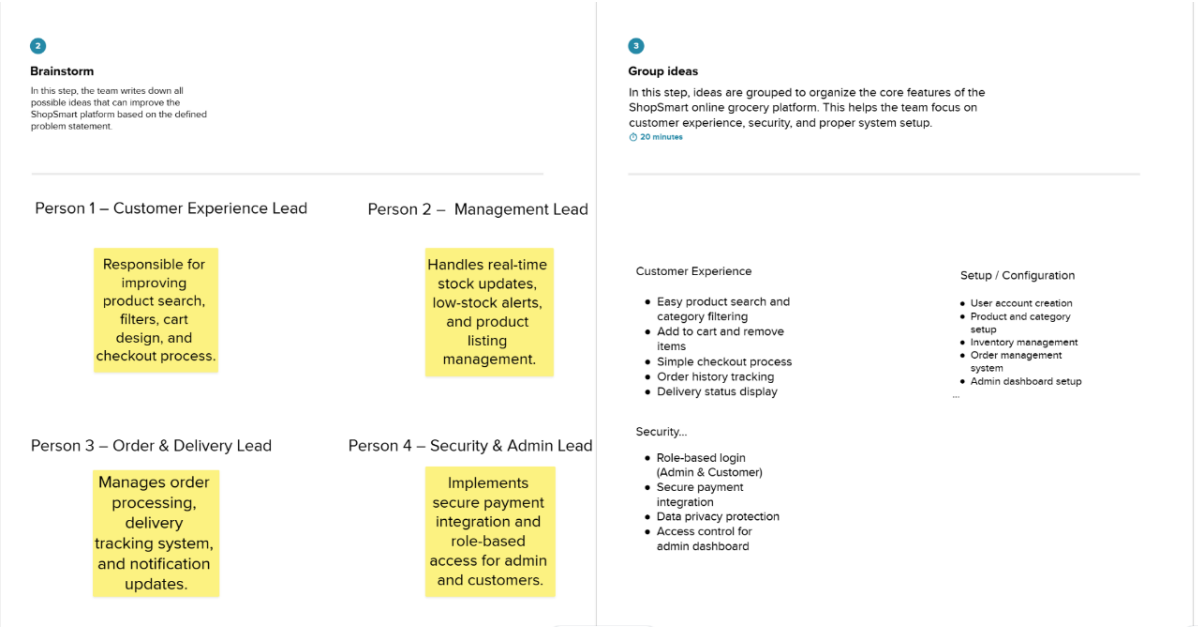
After brainstorming, we prioritize the ideas based on importance and feasibility. This helps us decide which core features to implement first — such as product search, cart, checkout, and inventory management — before adding advanced features.

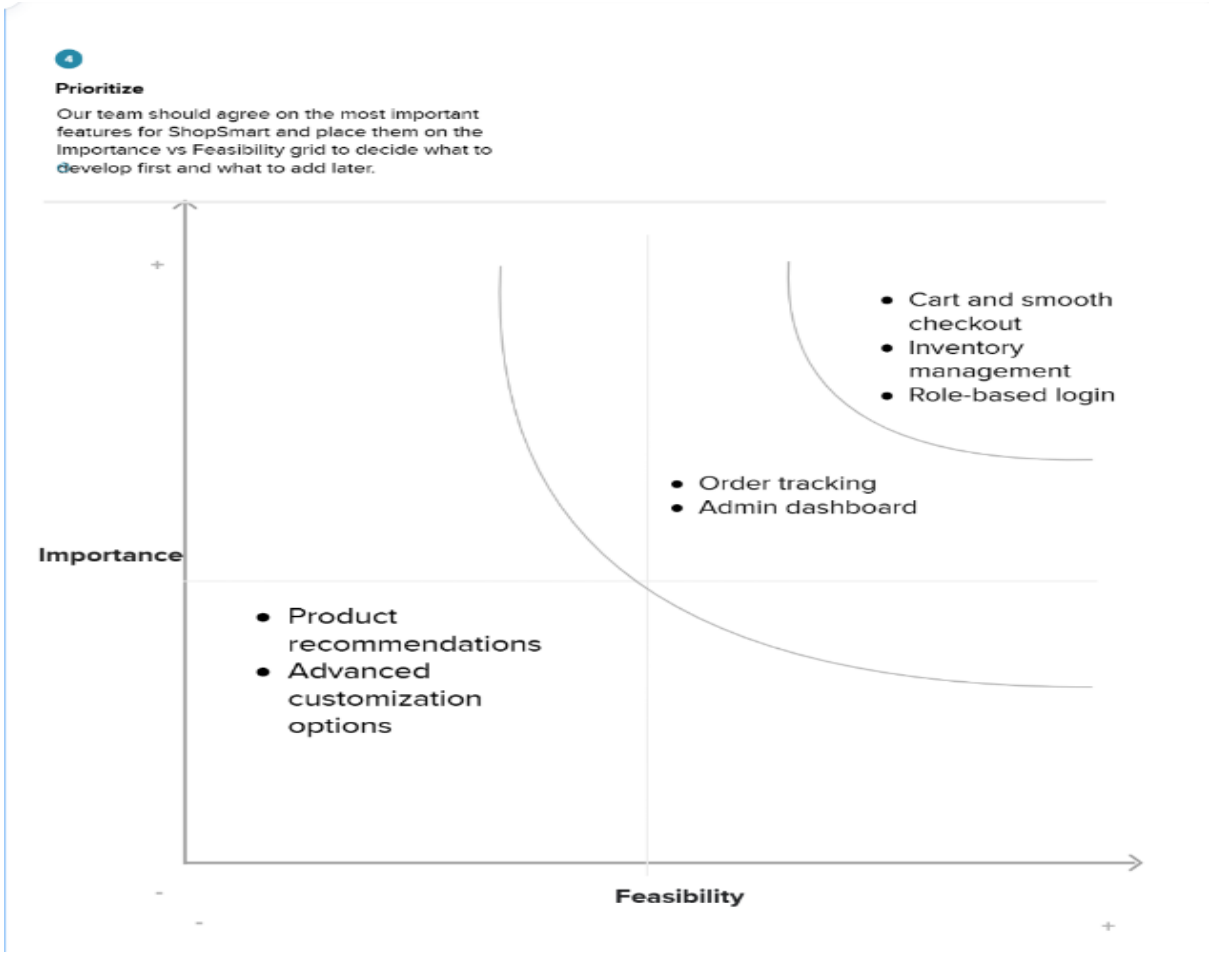
This structured approach helps our team collaborate effectively and design a smooth, reliable digital grocery shopping experience.

Step-1: Team Gathering, Collaboration and Select the Problem Statement



Step-2: Brainstorm, Idea Listing and Grouping





Step-3: Idea Prioritization
