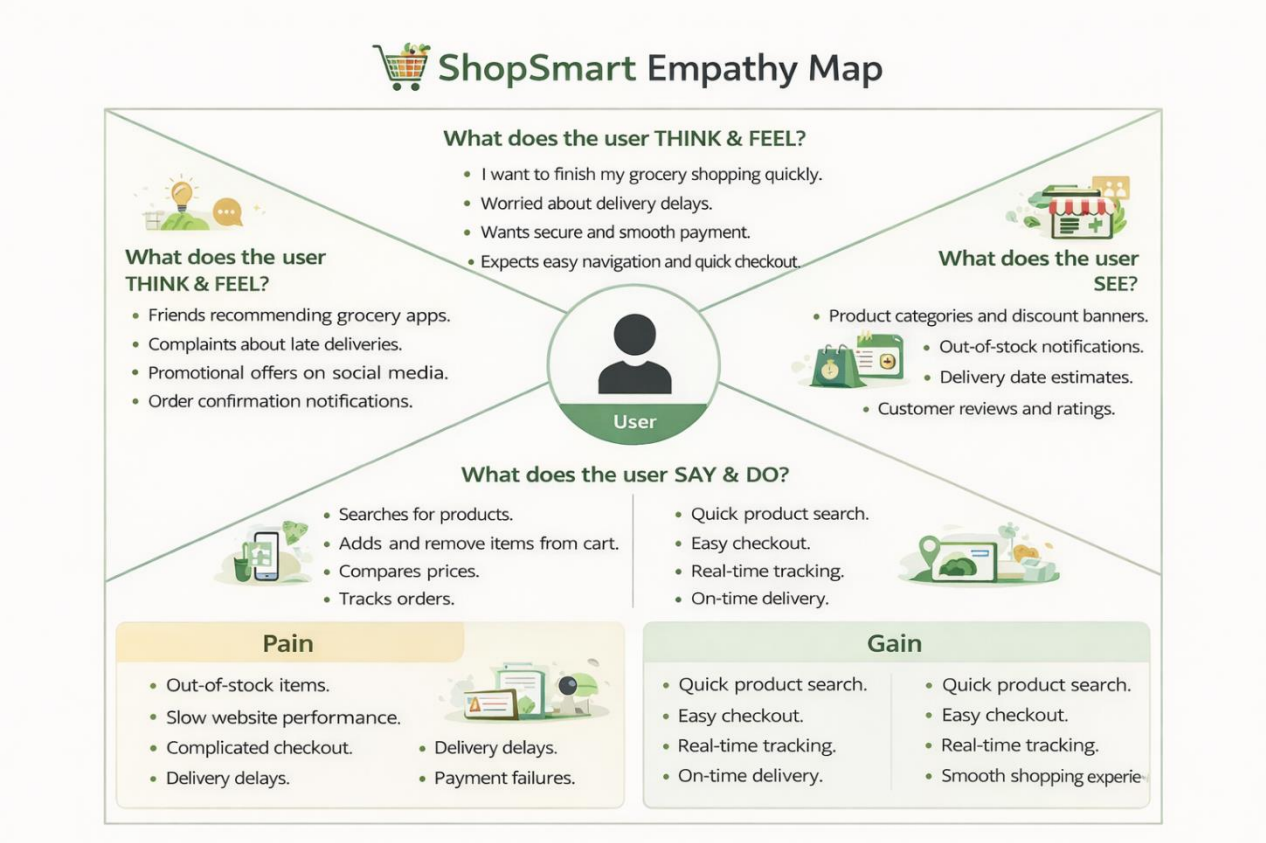
Project Name	ShopSmart: Your Digital Grocery Store Experience
Maximum Marks	4 Marks

Empathy Map Canvas:

An empathy map is a simple visual tool used to understand how customers experience the **ShopSmart online grocery platform**. It captures customer behaviors, needs, frustrations, and expectations while browsing products, adding items to the cart, and completing purchases.

This tool helps the team clearly understand customers' thoughts, emotions, and challenges during their shopping journey. By creating this empathy map, we can see the platform from the customer's point of view — including their goals, problems, and feelings when they face issues like product unavailability, delayed delivery, or complicated checkout processes.

Understanding these insights helps us design a smarter, faster, and more user-friendly digital grocery experience that improves customer satisfaction and trust.



ShopSmart Empathy Map – Store Admin

What does the admin THINK & FEEL?

- I need to manage orders efficiently.
- Worried about stock shortages.
- Wants smooth order processing.
- Needs accurate inventory tracking.

What does the admin HEAR?
